

File Manager Module

THE GOAL

We aim to remove the complexities and barriers related to exchanging files. We make it simple for your customers and staff to first connect and then upload and download files needed to carry out everyday business.

THE SOLUTION

The MAP Automation File Manager is a browser based file management tool that is instantly accessible by your staff and customers. It requires no software to be installed and unlike traditional file transfer utilities and email, there are no frustrating security issues preventing the file exchange from taking place.

The enhanced user screens provide a convenient and easy to use interface with a built in progress bar providing instant feedback on time remaining. The functionality is complimented with the ability to add comments to files and full tracking of changes over time.

THE FEATURES

Instant Access Set-up new users and automatically email log-in details for an instant connection.

No Software to be Installed *File Manager* is a web based application that is supported across all the main browsers.

Secure File Exchanges *File Manager* can be delivered through HTTPS and is therefore more secure than traditional FTP.

Makes doing business with you easy A delay and jargon free approach to doing business makes you the first choice.

AT A GLANCE

instantly set-up new users and email the details

Staff and customers connect through your website so no software to install at their end.

File exchanges are secure and encrypted through HTTPS

Provide a jargon free way of exchanging files and avoid all the frustrations of loading and supporting software.
